

THE UNEXPLAINED FILES
BOOK SEVEN

THE GREATEST UFO ENCOUNTERS IN HISTORY

TRUE STORIES OF EXTRAORDINARY SIGHTINGS,
CLOSE ENCOUNTERS AND UNEXPLAINED EVENTS
THAT CHANGED THE WORLD

ALDEN M. CORVALE

THE GREATEST UFO ENCOUNTERS IN HISTORY

*Witness Testimony, Radar Tracks and Unexplained Events
from 1947 to the Modern UAP Era*

Book Seven of The Unexplained Files

Alden M. Corvale

Updated through August 2026

This is an original work of popular nonfiction for *The Unexplained Files*. It examines historically significant UFO and UAP encounters using contemporary reports, official investigations, archival records, scientific commentary and later analysis. The purpose is not to prove a predetermined explanation, but to reconstruct what witnesses reported, what investigators could verify, and what remains uncertain.

The word *encounter* is used broadly. Some cases involve a single pilot or police officer. Others involve radar operators, military aircrews, schoolchildren, ground witnesses or entire cities. A few produced photographs, films, radar returns, physical traces or official memoranda. Many did not. Those differences matter.

An unidentified object is not automatically an extraterrestrial vehicle. A witness can be sincere and mistaken. Radar can track clutter. Cameras can distort speed and distance. Memory changes over time. Secret aircraft, balloons, astronomical objects and satellites have generated genuine UFO reports. At the same time, a case should not be declared solved merely because a possible explanation exists. Good investigation asks whether an explanation actually fits the timing, geometry, witness descriptions and available data.

This book therefore uses an evidence ladder. Contemporary documentation is weighted more heavily than late recollection. Independent witnesses are stronger than repeated retellings of one source. Instrument data are valuable only when their calibration and geometry are known. Official classification as "unidentified" means that investigators did not reach a satisfactory identification from the data available to them; it does not mean they concluded that the object was alien.

Several famous cases have been reanalyzed with modern tools. Some have become less mysterious. Others remain incomplete because crucial sensor data were never recorded, were not retained, or have not been made public. The modern UAP era has made this

limitation especially clear: better sensors do not automatically produce better answers unless metadata, range, platform motion and environmental context are preserved.

Where later official analysis changes the interpretation of a famous case, this edition says so directly. Mystery is strongest when it survives accurate description.

Contents

Part I - The Flying Saucer Era

1. Kenneth Arnold: The Sighting That Named an Era
2. Roswell: Debris, Headlines and a Legend
3. The Mantell Incident: A Fatal Pursuit
4. The Gorman Dogfight: A Light That Would Not Behave
5. The Lubbock Lights: A Formation over Texas
6. Washington, D.C., 1952: Radar over the Capital
7. The Tremonton Film: Bright Objects on Motion Picture Film
8. Levelland, 1957: Engines, Lights and a Texas Night

Part II - Close Encounters and Global Cases

9. Socorro, 1964: The Policeman and the Egg-Shaped Craft
10. Westall, 1966: A Schoolyard Looks Up
11. Shag Harbour, 1967: Lights into the Atlantic
12. Falcon Lake, 1967: Canada's Most Controversial Close Encounter
13. Pascagoula, 1973: Two Men by the River
14. Tehran, 1976: Fighters, Radar and Instrument Failure
15. Colares, 1977: Operation Prato and the Brazilian Amazon
16. Kaikoura, 1978: Lights over New Zealand
17. The Val Johnson Incident, 1979: A Patrol Car Meets a Light
18. Rendlesham Forest, 1980: Britain's Military UFO Classic
19. Trans-en-Provence, 1981: A French Physical-Trace Case
20. Japan Airlines Flight 1628, 1986: A Giant Object over Alaska

Part III - Mass Sightings and the Modern UAP Era

21. The Belgian UFO Wave, 1989-1990
22. Ariel School, 1994: The Children of Ruwa
23. The Phoenix Lights, 1997: One Night, More Than One Event
24. The Nimitz Tic Tac, 2004: The Encounter That Changed the Debate
25. O'Hare International Airport, 2006: A Disc over the Terminal
26. Stephenville, 2008: Radar, Witnesses and Texas Skies
27. Aguadilla, 2013: The Puerto Rico Infrared Video Revisited
28. Gimbal, 2015: Rotation, Geometry and an Unresolved Object
29. GoFast, 2015: When Apparent Speed Meets Parallax

30. The New Military Encounters, 2023-2026

Special Dossier I - What Makes a UFO Encounter Strong?

Special Dossier II - Pilot Witnesses, Radar and the Problem of Sensor Interpretation

Appendix A - Chronology of Major Encounters

Appendix B - Evidence Reliability Scale

Appendix C - Common Misidentifications

Appendix D - A Practical Guide to UFO Video Analysis

Appendix E - Where to Find the Official Records

Appendix F - The Questions That Remain
