This book is a work of true-crime history and missing-person analysis. It is written for educational and informational purposes. Open investigations can change as new evidence appears, and historical accounts can contain disputed details.

The book distinguishes confirmed facts from theory wherever possible. It does not accuse uncharged individuals of crimes, and it does not treat rumor, internet speculation, or reported sightings as proof.

Introduction - The Missing Final Chapter

Some disappearances begin with violence. Others begin with weather, machinery, navigation, illness, panic, or one private decision no witness ever saw. What unites them is not a single cause but a missing final chapter.

This volume deliberately avoids repeating the modern missing-person cases already explored in Book 3, **Vanished Without a Trace**. Here the lens widens: historical disappearances, maritime ghost ships, lost aircraft, public figures, children, travelers, and cases in which the last confirmed trace is stranger than any invented ending.

The goal is not to make mystery more mysterious. It is to identify what is known, what is strongly suggested, and what remains speculation. A disappearance deserves curiosity, but it also deserves discipline.

Contents

1. What Makes a Disappearance Mysterious?
2. Michael Rockefeller - A Capsized Boat off New Guinea
3. Harold Holt - A Prime Minister Lost in the Surf
4. Glenn Miller - The Musician Who Vanished Over the Channel
